(Manuel van Rooyen)

Special Conditions and Amendments

GENERAL INFORMATION

Arrival

On arrival at Johannesburg International Airport and completion of all necessary documents at immigration including a temporary license for your rifles, you will be met by Manuel or one of our team. We will then transport you by road to either, a Guest House if arriving late, or travel to the hunting area, where rifles can be sighted in ready for hunting which will resume the next day. South Africa is still one of the safest countries to visit in Africa, whether hunting or sight seeing.

Accommodation

Accommodation is in chalets with their own adjoining bathrooms including hot water, or for the more adventurous in typical tented camps.

Food and Drinks

All meals are supplied and will prepare delicious meals of game taken on the hunt, as well as regular beef, lamb and chicken dishes. PLEASE notify us if you require a special diet so that arrangements can be made well ahead of time. We supply all spring water, soft drinks, traditional South African wines.

Climate and Clothing

Typical hunting season is from March to October, which are winter And Autumn months where temperatures of 37°F are common in early mornings and evenings. Day temperatures vary between 80-95°F. You will need 3 - 4 sets of light neutral coloured trousers, shirts, shorts, underwear and socks. A light cool sweater, warm hunting jacket and 1 pair of well worn in hunting boots as well as a pair of comfortable relaxing shoes / running shoes for after the hunt is also required. A lot of walking can be expected so it is advisable that the hunter is in a reasonable state of fitness. A hat or cap as well as Sun Block must also not be forgotten as the African sun can be unforgiving. Other helpful items are - hunting knife, gloves, binoculars, sun glasses, flashlight and camera with a good supply of film.

Laundry

Laundry is done on a daily basis or as required, to minimize clothing brought.

Medical

PLEASE ADVISE US if you have a medical problem. If on medication ensure that you bring enough medication with you for the duration of the hunt. THIS IS A MALARIA FREE AREA, NO PRECAUTION NEEDED.
